

Orange County Department of Health Community Health Improvement Plan: Annual Community Health Status Report for 2022

Created September 2023

Focus Area 1: Increase Access to Healthy and Affordable Foods

Poor diets can lead to chronic illnesses such as:

- Heart disease
- Type 2 diabetes
- Obesity

The Orange County Department of Health's Community Health Improvement Plan aims to create an environment where everyone has access to healthy and affordable food.

Evidenced Based Strategy #1: Increase the availability of affordable healthy goods especially in the communities with limited access through sustaining OCDOH funded farm markets

Activities:

- Maintain current farmers market and expand number of participating farmers

Average Number of Farmers at Farmer's Market

2022:

- At the Newburgh Farmer's Market, a range of 3-4 farmers attended
- At the Port Jervis Farmer's Market, a range of 4-10 farmers attended

Focus Area 2: Increase Food Security

Food security means having reliable access to food to avoid hunger.

Access to healthy food supports overall health, reduces chronic diseases, and helps people avoid unnecessary health care.

Evidenced Based Strategy #1: Screen for food insecurity, facilitate and actively support referrals

Activities:

- Create policies and processes for active connection to WIC and/or SNAP

Evidenced Based Strategy #2: Connect and enroll families and individuals in any eligible nutrition or community programs

Activities:

- Utilize community health workers through county programs to identify and connect families with food programs

Number of Referrals Made for Food Insecure Residents and Families from OCDOH

	Baseline (Q1 2022)	Baseline (Q2 2022)	Baseline (Q3 2022)	Baseline (Q4 2022)	Baseline (2022)	Q1 2023	Q2 2023
Newburgh HOFM	0	5	615	0	620	0	0
Port Jervis HOFM	0	52	615	9	676	0	0
MICHC	N/A	N/A	N/A	N/A	N/A	40	46
Total	0	57	1230	9	1296	40	46

Note: Healthy Orange Farmers Market (HOFM)

Newburgh food insecurity tracking forms were conducted from July 2022 to November 2022; Port Jervis food insecurity forms were conducted from June 2022 to October 2022.

Healthy Orange data are only collected at Healthy Orange Farmer's Markets and select community events (such as veterans' picnics).

There is no indoor winter farmer's market so not data are collected in most of the first and fourth quarters.

MICHC collects information on food insecurity on their intake forms but does not have a process to report quarterly numbers.

Focus Area 3: Increase Cancer Screening Rates for Breast, Cervical, and Colorectal Cancer

Evidenced Based Strategy #1: Remove structural barriers to cancer screening by working with employers to provide employees with paid leave or the option to use flex time for cancer screenings

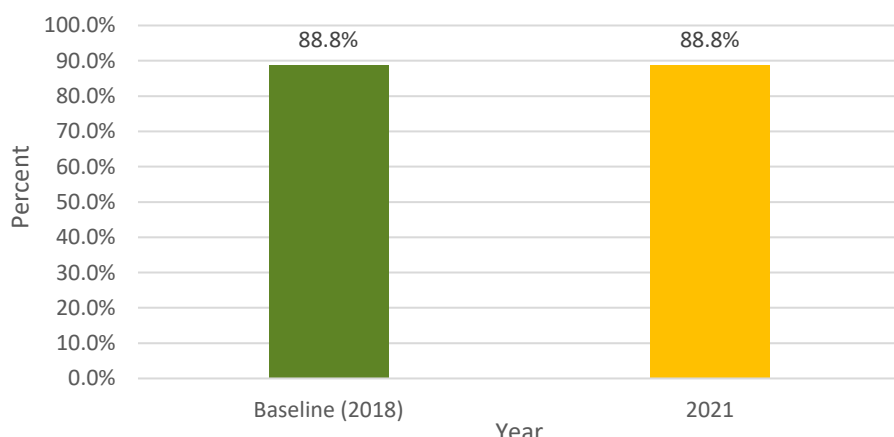

Activities:

- Partner with the Chamber of Commerce to connect with worksites to establish paid leave policies for screenings
- Recruit worksites with current policies in development to host one-time on-site screening events

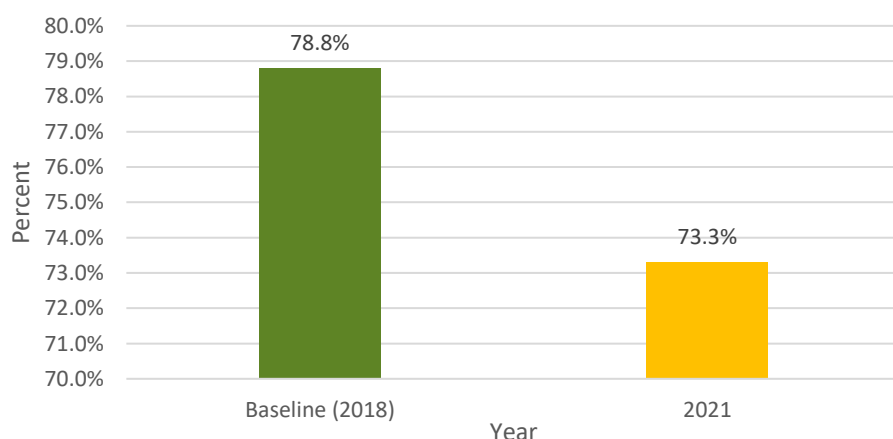

Getting screening tests regularly may find breast, cervical, and colorectal (colon) cancers early, when treatment is likely to work best.

Percent of Women Aged 21-65 Receiving Cervical Cancer Screening

Percent of Women Aged 50-74 Receiving Breast Cancer Screenings

Evidenced Based Strategy #2: Remove structural barriers to cancer screening by increasing primary care provider connections

Activity:

- Develop a system to refer patients without primary care when presenting to the emergency department or urgent care setting

Evidenced Based Strategy #3: Remove economic barriers to cancer screening by ensuring access to health insurance

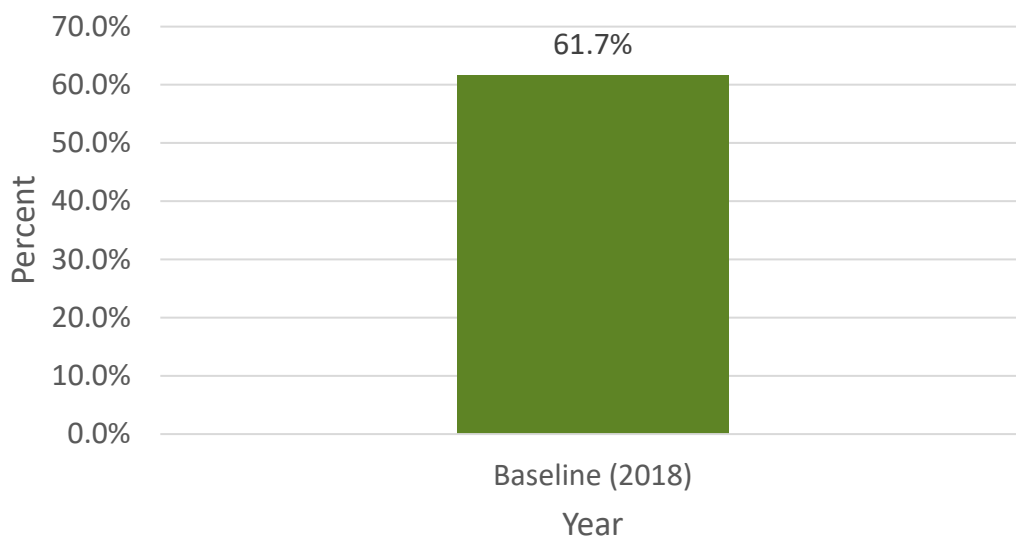

Activity:

- Facilitate connections between insurance navigators with healthcare providers, community organizations, and OCDOH programs

Colorectal cancer is a leading cause of cancer death in the United States.

Source: CDC, 2023,
https://www.cdc.gov/cancer/colorectal/basic_info/

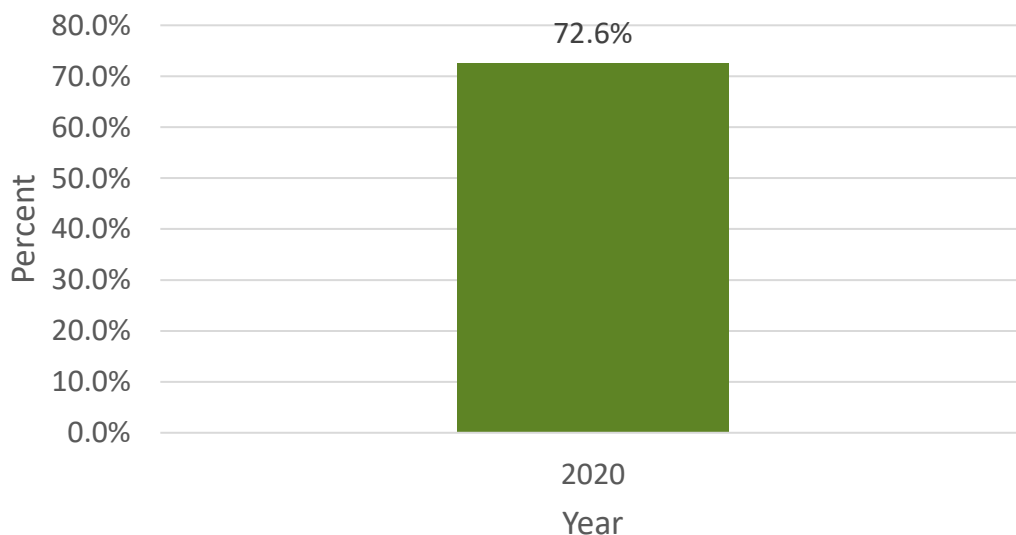

Percent of Adults Aged 50-64 Receiving Colorectal Screening

Long Term Indicator:

By December 2024, increase the percentage of adults ages 50-64 receiving colorectal screening by 5% from 61.7% to 64.8%

Percent of Adults Aged 50-75 Receiving Colorectal Screening

Focus Area 4: Prevent Opioid and Other Substance Misuse and Deaths

Evidenced Based Strategy #1:

Increase the availability of/access and linkages to medications for opioid use disorder (MOUD) including Buprenorphine

Activity:

- Develop internal policies/procedures for the initiation of MOUD administration in the emergency departments

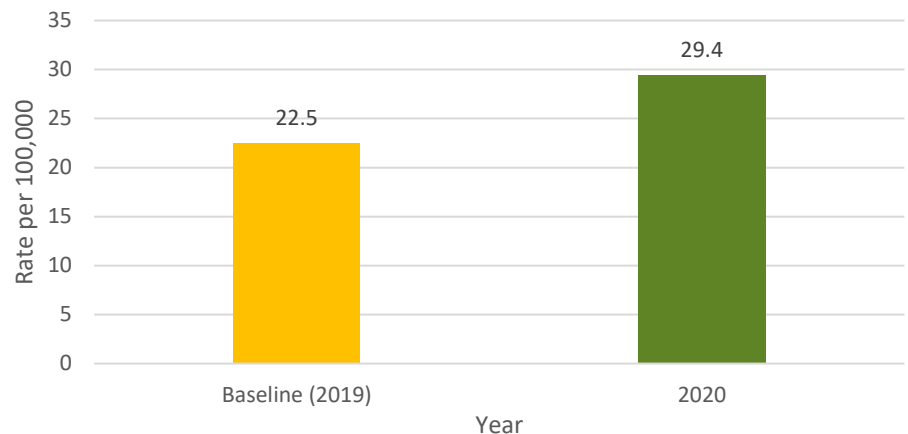

Evidenced Based Strategy #2:

Increase the availability of access to MOUD including Buprenorphine

Activity:

- Organize and fund MOUD implementation trainings for health care providers prescribing Buprenorphine

Opioid Overdose Deaths, Age-Adjusted Rate per 100,000

Overdose deaths remain a leading cause of injury-related death in the United States.

Source: CDC, 2023,

<https://www.cdc.gov/drugoverdose/epidemic/index.html>

Number of MOUD Trainings for Prescribing Buprenorphine

Baseline (2022)	1
Q1 2023	0
Q2 2023	1
Q3 2023	1
Q4 2023	TBD

Note: Waiver training barrier removed. No longer need waiver to prescribe buprenorphine if you have a valid state license to practice and current DEA registration.

Evidenced Based Strategy #3: Promote and support the expansion of the PeerRX application for peer referrals at the emergency department

Activity:

- Engage the hospital systems to develop protocols to utilize the crisis call center for a warm hand off for treatment services

Number of Peer Referrals Made				
	Baseline (2022)	Q1 2023	Q2 2023	Q3 2023
SLCH	137	22	26	27
311 Call Center	270	52	45	63

Evidenced Based Strategy #4: Establish additional permanent safe disposal sites for prescription drugs and distribution of Naloxone boxes

Activity:

- Determine locations for disposal sites and Naloxone distribution boxes

Number of Naloxone Box Locations	
Q1 2022	5
Q2 2022	14
Q3 2022	31
Q4 2022	11
Total 2022	61
Q1 2023	5
Q2 2023	47
Q3 2023	55
Q4 2023	TBD

Note: Some locations have more than one box

Naloxone quickly reverses an overdose by blocking the effects of opioids.

Source: CDC, 2023, <https://www.cdc.gov/s-topoverdose/naloxone/index.html>

Naloxone Boxes

- 28 agencies
- 107 locations
- 168 boxes installed
